

SB24-132: Evaluation Protections & Educators

APPROVED by Governor April 19, 2024. Effective August 7, 2024.

Overview

This bill, which was a priority for the League, would extend evaluation protections to a larger number of educators. The bill would increase confidentiality protections of evaluation reports and public records that are used in preparing the evaluation reports to all teachers, principals, administrators, special services providers, and education support professionals. Under current law, only licensed educators are awarded confidentiality when it comes to their personnel records, including yearly evaluations. This bill extends protections to other educators and school staff.

School Impact

Increases privacy for evaluations for all school-based staff subject to evaluation.
