Advanced Identity & Access Management

IP-Based Protections

✦ Allow or block logins based on IP

Set rules for individual IPs or CIDR ranges

Give rules convenient names

✦ MFA bypass based on IP

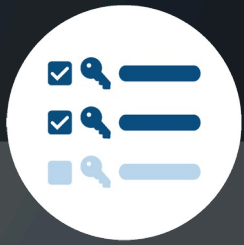

✦ Auto IP block based on suspicious activity

Review suspicious IPs to confirm or override the block

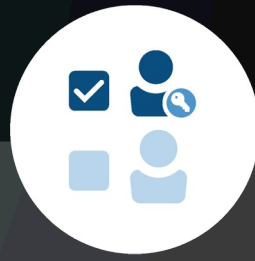

Security Roles

CREATE

SELECT

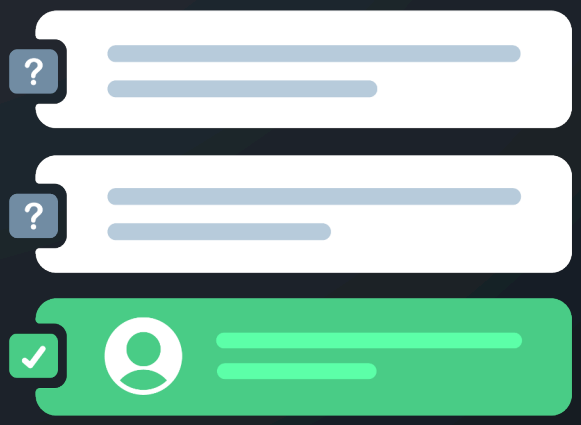

APPLY

**Assign powers
to groups and users**

1. Create a role
2. Select powers (access permissions)
3. Apply to members (groups and users)

Account Claiming

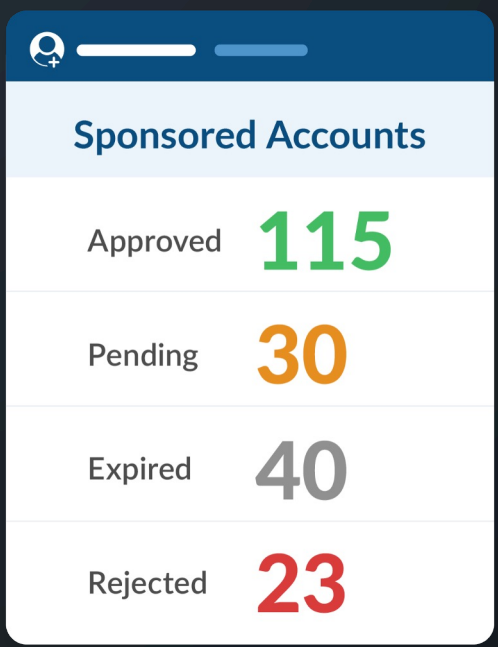

Self-service for creating & managing new accounts

- ✦ New users automatically claim AD accounts, avoiding manual password distribution
- ✦ Custom challenge questions by role
- ✦ Rich text EULA/policy acknowledgement
- ✦ Automatic updates from any source by CSV, including OneSync
- ✦ Streamline onboarding and reduce support tickets

ADVANCED IAM

Account Sponsorship

Sponsored Accounts	
Approved	115
Pending	30
Expired	40
Rejected	23

✦ **Account Requests & Approvals**

✦ **Auto Expiration**

No more orphaned user accounts lingering in your environment.

ADVANCED IAM

Passkeys

Sign In to ClassLink

Username

Password

 Sign in with Google

 Sign in with Passkey

- ✦ **Phoneless MFA**
- ✦ **Faster Login**
- ✦ **More Secure**

No password required.
The first step to a passwordless future.

Agreements

Assign agreements such as AUPs to profiles, groups, or users

 **Acceptable Use Policy (AUP)**

- ✦ Prevent logins without policy acknowledgement
- ✦ View reports on accepted/declined acknowledgements
- ✦ Quickly distribute information to target audiences

Advanced Threat Detection

New reports for high risk events

- ✦ Different logins from same IP
- ✦ Failed login attempts
- ✦ Failed password recovery attempts

Analytics +

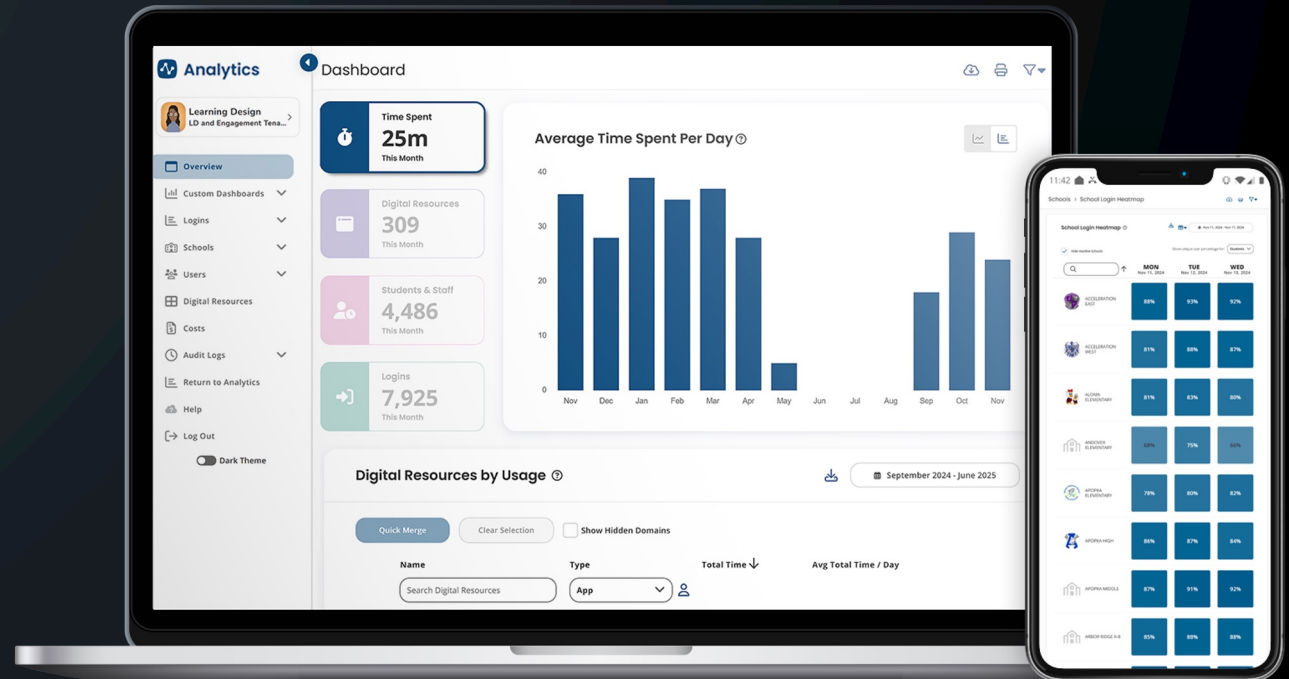

ClassLink Analytics+

Understand and share true usage metrics

Analyze all usage
on school devices

*Includes native app usage

AppTrack

APPTTRACK

REQUESTS

Structured workflow for proper evaluation

SECURITY

Cybersecurity and compliance checks before classroom use

INTEROPERABILITY

Confirm new resources work with existing standards & infrastructure

BUDGET

Monitor spending from the start, no surprises later

PROGRESS

Clear status visibility, from submission to decision

ThreatScan

ThreatScan

Catch exposed accounts before hackers strike

- ✦ Find exposed credentials
- ✦ Receive security alerts
- ✦ Require password resets
- ✦ Monitor your domains
- ✦ Know your risk
